

**TYPE: Sepitam-PI204G-DF-60W****Technical Specification of Sepitam-PI204G-DF/60W****Industrial 4 port 10/100/1000 POE switch and Two SFP fiber ports****Description:**

The **Sepitam-PI204G-DF-60W** is a 60W gigabit industrial UPoE fiber switch. It has 4\*10/100/1000M UPOE ports and 2\*1000M uplink SFP fiber slot port. Port 1-4 can support the super high power 60W UPOE output, backward compatible with the IEEE 802.3af/at PoE standard. Single-port PoE power is 60W, and the maximum PoE output power less than 250W. As a PoE power supply device, it can automatically detect and recognize the power receiving equipment that meets the standard and supply power through the network cable. It can supply power to POE terminal equipment such as wireless AP, Ip camera, industrial sensor through network cable, and meet the network environment that needs high-density PoE power supply. It is suitable for intelligent transportation, rail transit, electric power, mining, metallurgy and green energy. Industrial scenes such as construction set up a cost-effective and stable communication network

**Feature:**

- ◆ **Full gigabit Ethernet port**
  - All Series support full gigabit Ethernet port and SFP fiber slot port, high-speed and high-bandwidth connections, meeting the networking requirements of various scenarios;
  - Support non-blocking wire speed forwarding
  - Support full duplex based on IEEE802.3x and half duplex based on Backpressure
- ◆ **Smart PoE power supply function**
  - 4\*10/100/1000Base-T RJ45 ports support UPoE power supply to meet the needs of PoE power supply in various scenarios in the industrial field.
  - Single-port POE has a maximum output power of 60W and is backward compatible with the IEEE 802.3af/at PoE power supply standard. It automatically recognizes PoE devices for power supply without damaging non-PoE devices.
  - The PoE port supports the priority mechanism. When the remaining power is insufficient, the power supply of the high-priority port is preferentially guaranteed to prevent the device from being overloaded.

◆ **The equipment is stable and reliable**

- The host has low power consumption, no fan mute design, aluminum alloy metal shell, excellent heat dissipation, and ensure stable operation of products.
- The equipment fully meets the requirements of CCC, CE,FCC and RoHS safety regulations, and is safe and reliable.
- The user can easily understand the working status of the device through the power indicator (PWR), port status indicator (Link/Act), and POE operation indicator.
